# INDEX TO VOLUME IX.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Accumulation of vegetable matter, 731
Acidity, decreasing, action on sulphides, 745
Adiassewich, on replacement deposits, 234
Africa, physiographic areas, 607
Agricola, on ore genesis, 218
Alabama, underground waters of, 245
Alabandite, 485; experiments with, 756.
Alberta stopes, Mackay, Idaho, 319
Albite, 449
Alder Creek mining district, geology, 309
Allen, E. T., analysis by, 425
Allen, E. T., and Crenshaw, J. L., on sulphides, 555, 766
Allen, R. C., *Relative to an extension of the Menominee Iron Range eastward from Waucedah to Escanaba, Michigan*, 236–238
Allocthonous origin of coal, 731
Allophane, 115
Alteration, bornite to chalcocite, 379; deposits in lava flows, 548; granite, 392; hydrothermal, 423; lavas, 428; ores, San Francisco district, Utah, 541, 545; pneumatolytic, 423; pyroxene to amphibole, 376; quartz monzonite, 424; rock of Michipicoten district, 127; sedimentary rocks, 429
*Aluminum hydrates in clays, The occurrence of* (Edwards), 112
Aluminum hydrates in clays, 402
American mining law, 598
Analyses (*see* Chemical analyses)
Ankerite, 128
Aragonite, 6
Artesian water, 768
Ascending secondary sulphide enrichment, 389
Asphaltic rock in Belgian Congo, 662
Atherton, T. W. T., on Katanga copper deposits, 606
Atlas Mountains, 607
Augite latite, analysis, 417
Aurichalcite, 3
Autocthonous origin of coal, 731
Auto-reduction, 523
Axinite, 289

Babeyru placer, 638
Bain, H. F., on Joplin lead and zinc deposits, 759
Ball, S. H., and Shaler, M. K., *Economic geology of the Belgian Congo, Central Africa*, 605–663
Bamanga copper deposit, 630
Baptista, P. J., on Katanga copper deposits, 618
Bard, D. C., on sulphide enrichment, 750
Barlow, A. E., on Sudbury nickel deposits, 506
Barnett, V. H., on geologic mapping, 37
Barrell, J., on contact deposits, 182; on contact metamorphism, 293; on metamorphic zones, 288
Bastin, E. S., review by, 79
Batholith, 306; Harney Peak, 266
Bäumler, on nickel ores, 672
Bauxite, 112; in clay, percentage of, 120
Beaumont, Elie de, theory of ore deposition, 210, 221
Beaver Carbonate deposit, 536, 537
Beaver Lake district, Utah, 414, 530
Becher, J. J., on ore deposition, 219
Beck, R., on magmatic sulphide ores, 366
Becke, F., on alteration of pyroxene to amphibole, 376
Becker, G. F., on diffusion, 357; on the Comstock lode, 209
*Belgian Congo, Central Africa, Economic geology of the* (Ball and Shaler), 605
Belgian Congo, mining progress, 605
Belgian Congo and Brazil, similarities, 616
Bena Sombo, saline water, 659

# INDEX TO VOLUME IX.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Accumulation of vegetable matter, 731
Acidity, decreasing, action on sulphides, 745
Adiassewich, on replacement deposits, 234
Africa, physiographic areas, 607
Agricola, on ore genesis, 218
Alabama, underground waters of, 245
Alabandite, 485; experiments with, 756.
Alberta stopes, Mackay, Idaho, 319
Albite, 449
Alder Creek mining district, geology, 309
Allen, E. T., analysis by, 425
Allen, E. T., and Crenshaw, J. L., on sulphides, 555, 766
Allen, R. C., *Relative to an extension of the Menominee Iron Range eastward from Waucedah to Escanaba, Michigan*, 236–238
Allocthonous origin of coal, 731
Allophane, 115
Alteration, bornite to chalcocite, 379; deposits in lava flows, 548; granite, 392; hydrothermal, 423; lavas, 428; ores, San Francisco district, Utah, 541, 545; pneumatolytic, 423; pyroxene to amphibole, 376; quartz monzonite, 424; rock of Michipicoten district, 127; sedimentary rocks, 429
*Aluminum hydrates in clays, The occurrence of* (Edwards), 112
Aluminum hydrates in clays, 402
American mining law, 598
Analyses (*see* Chemical analyses)
Ankerite, 128
Aragonite, 6
Artesian water, 768
Ascending secondary sulphide enrichment, 389
Asphaltic rock in Belgian Congo, 662
Atherton, T. W. T., on Katanga copper deposits, 606
Atlas Mountains, 607
Augite latite, analysis, 417
Aurichalcite, 3
Autocthonous origin of coal, 731
Auto-reduction, 523
Axinite, 289

Babeyru placer, 638
Bain, H. F., on Joplin lead and zinc deposits, 759
Ball, S. H., and Shaler, M. K., *Economic geology of the Belgian Congo, Central Africa*, 605–663
Bamanga copper deposit, 630
Baptista, P. J., on Katanga copper deposits, 618
Bard, D. C., on sulphide enrichment, 750
Barlow, A. E., on Sudbury nickel deposits, 506
Barnett, V. H., on geologic mapping, 37
Barrell, J., on contact deposits, 182; on contact metamorphism, 293; on metamorphic zones, 288
Bastin, E. S., review by, 79
Batholith, 306; Harney Peak, 266
Bäumler, on nickel ores, 672
Bauxite, 112; in clay, percentage of, 120
Beaumont, Elie de, theory of ore deposition, 210, 221
Beaver Carbonate deposit, 536, 537
Beaver Lake district, Utah, 414, 530
Becher, J. J., on ore deposition, 219
Beck, R., on magmatic sulphide ores, 366
Becke, F., on alteration of pyroxene to amphibole, 376
Becker, G. F., on diffusion, 357; on the Comstock lode, 209
*Belgian Congo, Central Africa, Economic geology of the* (Ball and Shaler), 605
Belgian Congo, mining progress, 605
Belgian Congo and Brazil, similarities, 616
Bena Sombo, saline water, 659

Bendigo gold fields, 208
Bertrand, A., on the Congo River, 608
Beyer, S. W., and Williams, I. A., on composition of clay, 115
Beyschlag, F., review of work by, 776
Big Bonanza copper deposits, Alaska, 171
Bighorn coal bed, Montana, 713
Biotite-rich grano-diorite, 376
Bishof, on ore deposition, 222
Bituminous shales in Belgian Congo, 662
Black Hills, geology of, 265
Black Sulphur Spring, sediments of, 765
Blende, 173
Blythesdale Braystone, 769
Boise, C. W., on diamonds in Belgian Congo, 651
Boone limestone, 758
Boring, Kynuna, 770; Rand gold field, 208
Bornite, 377, 477, 481; altering to chalcocite, 379; dispersion, 576
Boston Basin, water of, 242
Boulder batholith, 396; geology of, 397
Boutwell, J. M., on Park City district, 420; on replacement deposits, 233
Branner, J. C., on occurrence of carnotite in Brazil, 676; on mineral waters of Arkansas, 760
Brazil, iron ores, 101
Brazil and Belgian Congo, similarities, 616
Brien, V., on gold in streams of lower Congo, 640
Brochantite, 550
Brögger, W. C., on contact deposits, 182; on ore deposition, 224
Brokaw, A. D., on gold solutions, 526
Building stone, recent literature on, 96
Burat, A., on ore deposits, 205
Burma, oil fields of, 594
Busanga series, 641
Butler, G. M., on nicholsonite, 6
Butler, B. S., *Geology and ore deposits of the San Francisco and adjacent districts, Utah*, 413–434, 529–558; on contact metamorphism, 292; on contact zones, 288
Butler Creek, Ark., 758
*Butte district, Montana, Paragenesis of the ore minerals in the* (Ray), 463
Buttgenbach, H., on Katanga copper minerals, 626

Cactus mine, Utah, 414
Cactus ore zone, 530, 532
Calamine, 4, 16
Calcite, 6
Calkins, F. C., on contact metamorphism, 291; on contact zones, 288
Campbell, M. R., on field construction of geologic sections, 147; review by, 300
Campbell, W., and Knight, C. W., on microstructure of nickeliferous pyrrhotites, 512
"Canga," 102, 103, 105
Cannel coal, organization, 737
Canneloid material in coal, 739
Capelton, Quebec, copper deposits, 162
Carbonates, action in reducing acidity, 750; in secondary sulphide enrichment, 483
Carbonized wood, 734
Carnotite, composition, 675; mode of occurrence, 680; occurrences, 676; relation to fossil vegetation, 682
*Carnotites of Colorado and Utah, A hypothesis for the origin of the* (Hess), 675
Caserto, L., on colloids, 561
Cassiterite, 642
Caué Peak, Brazil, 106, 107
*Certain phases of superficial diffusion in ore deposits* (Penrose), 20
Cesaro, M., on Katanga copper minerals, 626
Chalcocite, 378, 379, 474, 476; around bornite, 387; artificial, 560; dispersion, 576; formation in acid solutions, 566; primary origin, 227
Chalcocitization, 385
Chalcopyrite, 173, 377, 477, 481; dispersion, 576; experiment with, 751
*Chalcopyrite and other sulphides, On the relation of pyrrhotite to* (Thompson), 153
Challenge mine, saltness in lodes of, 241
Champion claims, Mackay, Idaho, 325
Chattanooga shale, 758
Chemical analyses—clays, 403; coal, 300; Belgian Congo, 661; garnet rock, 333, 338; granite-porphyry, 333; Horn silver ore, 549; Katanga

copper ore, 628; lava, fresh and altered, 429; lavas, 417; limestone, 344; limestone, altered, 431; limestone and resulting silicate rocks, 329; monzonite, fresh and altered, 425; pyroxene rock, 339, 340; quartz monzonite, 418; water, 243, 262
Chemical migration of materials, 20
Chilonga pipe, 657
Chloanthite, 665
Chlorine in underground waters, 248
Chloritization, 385
Chonolith, 398
Clapp, F. G., on water in Vinal Haven granite, 242
Claremont ore, Nevada, section, 563
Clark, F. R., on coal near Thompson, Utah, 726
Clark, J. D., on copper sulphide enrichment, 481
Clark, J. D., and Tolman, C. F., *The oxidation, solution, and precipitation of copper in electrolytic solutions and the dispersion and precipitation of copper sulphides from colloidal suspensions, with a geological discussion*, 559–592
Classification, ore deposits, 235, 776, 779; public coal land, 708; rocks of southwestern Colorado, 678
Clay, analyses, 117; definition, 112; recent literature on, 96
Clay base, 112
Clays, aluminum hydrates in, 402
*Clays, The occurrence of aluminum hydrates in* (Edwards), 112
Clegg mine, North Carolina, 167
Coal, analyses, 300; composition, 741; in Belgian Congo, 660; origin, 731
*Coal, On the composition and qualities of* (Jeffrey), 730
Coal bed, in Russell Fork coal field, Virginia, 724; near Bighorn, Rosebud County, Montana, 713; near Thompson, Utah, 726; on Tullock Creek, Rosebud County, Montana, 718
*Coal beds, lenticular, the use of thickness contours in the valuation of* (Rogers and Lesher), 707
Coal fields, buried, of England, 207; extension of, 206
Cobalt, 626
Cole, G. A. J., review of book by, 78
Coleman, A. P., on Sudbury district, 506; on the gold quartz veins of Ontario, 122
Collahuasi, Chile, ore, 560
Colloidal characteristics of veins, 589
Colloidal copper sulphides, formation of, 573; physical behavior, 576
Colloidal silica, 561
Colloidal solutions, 561
Colloidal sulphur, 581
Colorado carnotite field, 676
Commercial petrographic reports, 67
Comolite, 115
*Composition and qualities of coal* (Jeffrey), 730
Comstock lode, 209
Concentration, conditions of, 22; of zinc ore, Utah, 14
Conduction of heat in rocks, 297
Congo. *See* Belgian Congo
Congo River, 608
Connecticut Valley, underground waters of, 243
Construction and use of thickness contours, 712, 715
Construction of a geologic cross section, 143
Contact deposits, 533; alteration, 546
Contact metamorphic ore deposits, 283
Contact metamorphic replacement deposits, 343
Contact metamorphism, 177, 290, 593; Lake Superior region, 294; of limestone, phases of, 298
Contact metasomatism, 593
Contour map of formation surface, construction of, 64
Contour projection, 26
*Contours in the valuation of lenticular coal beds, The use of thickness* (Rogers and Lesher), 707
Convergence sheet, 66
Copal, 663
Copper, Belgian Congo, 617; Katanga, 606; recent literature on, 495, 691
Copper deposits, alteration, 545; Capelton, Quebec, 162; Ducktown, Tenn., 154; Gordonsville, Va., 168; La Touche Island, Alaska, 171; North Carolina, 165; Vershire, Vt., 158
*Copper deposits, The genesis of the Mackay* (Umpleby), 307
Copper minerals, Katanga, 625; paragenesis, 153–174
Copper ores, Atlantic states, 153; Butte district, 463; character of, 229
Copper placers, Congo River, 631

Copper sulphates, chemical behavior, 575
Copper sulphide, dispersion of, 579; selective accretion, 577
*Copper sulphide deposit in Plumas County, California, a magmatic, and its modification by ascending secondary enrichment, A geologic and microscopic study of* (Turner and Rogers), 359
Copper sulphides, colloidal, formation of, 573; in colloidal solutions, 559; in electrolytic solutions, 559
Copper Bullion tunnel, 315
Copper Cliff ore deposit, 507
Copper Gulch ore deposit, 530
Cornot, Jules, on Katanga copper and iron deposits, 605, 630
Cornu, F., on sulphide reactions, 746
Cortez Associated Mines, 435
Corundum, 658
Covellite, 379, 464, 471, 473; dispersion, 576; replacing zinc sulphides, 551
Covellite zone, Butte district, 464
Covellitization, 385
Cowskin River, Ark., 758
Creede ore, Colorado, section, 563
Creighton ore body, 507, 514
Creighton rock, petrographic character, 514
Crook, T., and Blake, G. I., on occurrence of carnotite, 676
Crosby, W. O., on the auriferous veins of Algoma, 122; on Washington Camp, Arizona, 287
Cross-bedding, 677
Cross section, geologic, construction of, 143; ore body of Gemini mine, Utah, 10
Crystallography—maucherite, 672
Crystal Mountains, 607, 609
Cummings, W. L., on occurrence of carnotite, 680
Cupric sulphate solution, experiments with, 750, 754
Cupric sulphide, spontaneous decomposition, 575
Cupriferous quartz veins, Belgian Congo, 631
Currents, effect on country rock, 259; indication of, 256
Custer granite, 270
Cyanite, 658
Cymophane, 658

Dacite, analysis, 417
Daggafontein boring, 208
Daly, R. A., review of book by, 486
Danburite, 459; replaced by jamesonite, 446
D'Andrimont, on pipes near Lake Moero, 655
Darton, N. H., on waters of the Great Plains, 247
Darwin, Charles, on the formation of sediments, 254
Daubrée, A., on ore deposition, 221, 232
Davis, N. B., discussion by, 689
Day, A. L., and Shepherd, E. S., on magmatic gases, 348; on volcanic waters, 257
Decreasing acidity, action on sulphides, 745
Deformation periods, Belgian Congo, 611
Delaware, underground waters of, 243
*Deposit of jamesonite near Zimapan, Mexico* (Lindgren and Whitehead), 435
*Deposition of gold in nature, On the* (Lenher), 523
Deposits formed by replacement of sedimentary rocks, 533
Deposits in lava flows, alteration of, 548
Depth, of ore formation, 591; of a formation, determination of, 58; of enriched sulphide zone, 753; of oxidized zinc ore bodies, 10; structure-contour method of determining, 64
Descending waters, action of, 12
*Descending waters, The rate of reduction of acidity of, by certain ore and gangue minerals and its bearing upon secondary sulphide enrichment* (Nishihara), 743
Diagrams—analyses showing replacement in rocks, 334; analyses showing transformation of limestone to secondary silicate rock, 328; bauxite in clay, percentage of, 120; clay, composition of, 119; formation of ore in Cactus ore zone, Utah, 532; paragenesis of zinc minerals, 12; secondary alteration, San Francisco district, Utah, 542
Diamondiferous gravel bar, Kasai River, 651
Diamonds, 653; in Belgian Congo, 648
Diaspore, 112
Dickson, C. W., on Sudbury ore deposits, 389, 506

Differentiated quartz vein minerals, 273
Differentiation, gravitative, 703
*Differentiation of a granitic magma as shown by the paragenesis of the minerals of the Harney Peak region, S. D.* (Ziegler), 264
*Diffusion, superficial, in ore deposits, Certain phases of* (Penrose), 20
Diffusion by leaching, 20; conditions of, 22; rate of, 240
Dike rocks, 312
Diopside rock, analysis, 329
Diopsidization, 335
Diorite, Michipicoten district, Ontario, 124
Diorite country rock, 636
Dip and strike, determination in contour projection, 29; of plane, determination of, 141
*Discussion—*
Commercial petrographic reports (Tomlinson), 67

Outlines of mineralogy for geological students (Cole), Schaller, 78
Structural geology (Leith), Kirk, 405
Studies on the geology of the iron ores of Lapland (Geijer), Edwards, 493
Titaniferous iron ore deposits in Solör (southeastern Norway) and its formation through differentiation processes (Foslie), Edwards, 702
A treatise on the American law relating to mines and mineral lands within the Public Land States and Territories (Lindley), Winchell, 598
The useful minerals and rare ores (McLeod), Umpleby, 703
Reyer, E., on ore deposition, 225
Richardson, C. H., review of book by, 190
Richthofen, F. von, on the Comstock lode, 209
Rickard, T. A., on circulating waters, 229
Ridge mine, Utah, 1
Ries, H., discussion by, 402; on clays, 112
Rock analysis, form for, 69
Rock pressure, test case of, 768
Rocks, of Butte mines, 466; San Francisco region, Utah, 415
Rocky district, Utah, 414
Rogers, A. F., on Butte copper ores, 228
Rogers, G. S., and Lesher, C. E., *The use of thickness contours in the valuation of lenticular coal beds*, 707–729
Rolfe, C. W., on composition of clay, 115
Rolling Downs formation, 769
Rosenbusch, H., on term eruptive, 72
Rotation of a projected plane, 30
Rubble ores, 106
Russell Fork coal field, 724
Ruwe gold lode, Katanga, 633
Ruwenzori, 608

St. Joe limestone member, 758
Sales, R. H., on ore deposition, 226; on ores of Butte district, 464
Saline waters, occurrence, 242
Salines, recent literature on, 85, 500
Salt, in Belgian Congo, 659
Salt water in borings, 242
Sandberger, V., on ore deposition, 222
Sandstone of carnotite field, 677
Sanford, S., on underground waters, 243, 244
San Francisco region, ore deposits, 529
*San Francisco and adjacent districts, Utah, Geology and ore deposits of the* (Butler), 413, 529
Sankuru River, 608

Schaller, W. T., review by, 78
Scheerer, Th., on water in magmas, 398
Schrader, F. C., on occurrence of fossil wood, 680
Schuerman, E., on sulphides, 743
*Scientific notes and news*, 98, 304, 411, 503, 603, 705, 780
Secondary alteration, 541
Secondary ores, Plumas County copper deposits, 367
Secondary silicate zones, 73, 175; origin, 278, 282
Secondary sulphide enrichment, 389, 743
Sections—Belgian Congo, 610; Cambridge Downs wells; carbonized wood, 734; Claremont ore, Nevada, 563; construction of, 143; Creede ore, Colorado, 563; Empire copper mine, 313; Engels mine, California, 363; Horn Silver ore body, 552; Kasai diamond gravels, 651; Lukasi copper deposit, 623; pyrrhotite, massive, 510; Ruwe gold deposit, 633; San Francisco region, Utah, 416; Star of Congo mine, 624 (*see also* Cross section)
Sediments from springs, 764; analyses, 764; microscopic examination, 765
Selective accretion, copper sulphide, 577
Sequence of minerals, Engels ore deposit, 382
Sericitization, 428
Shaler, M. K., with Ball, S. H., *Economic geology of the Belgian Congo, Central Africa*, 605–663
Sheeted veins, 123
Shepard, E. M., on waters of Missouri, 247
Siebenthal, C. E., *Spring deposits at Sulphur Springs, Ark.*, 758–767.
Sikasi mine, 639
Siku M'Bidi cupriferous quartz vein, 631
Silicate rocks, analyses, 329
Silicate zones, 73, 175, 294; origin, 278, 282
Silicification, 291, 428
Silver, Horn Silver mine, 557
*Silver enrichment, Studies in* (Palmer), 664
Slope distance, 48
Smith, G. O., on the classification of public lands, 709
Smith, W. S. T., *Some graphic methods for the solution of geologic problems*, 25–66, 136–152; on Joplin lead and zinc deposits, 759
Smithsonite, 2
Sodium chloride in inclusions, 456
Sodium salts, dispersive effect, 580
Solfataric action, 210
*Solution of geologic problems, Some graphic methods for* (Smith), 25, 136
Solution of oxidized copper minerals, 564
*Some graphic methods for the solution of geologic problems* (Smith), 25, 136
South Carolina, underground waters of, 244
Speak, S. J., on Katanga copper ores, 628
Spencer, A. C., on chalcocite enrichment, 484, 562; on sulphide enrichment, 750
Sphalerite, 550
Spores in coal, 735
*Spring deposits at Sulphur Springs, Ark.* (Siebenthal), 758
Spring waters, analyses of, 762
Springs, sulphur, sediments of, 765
Spurr, J. E., on contact metamorphism, 291
Spurr, Garrey and Fenner, on Matehuala ore deposits, 179
Star district, Utah, 413
Star of the Congo mine, 619, 622, 624
Steidtman, E., on accumulation of chlorine in underground waters, 248
Steiger, George, analyses by, 425, 429; porosity determinations by, 346
Stelzner, A. W., on ore deposition, 221
Stereograms—O K mine, Utah, 531; ore shoot beneath shale, 534; San Francisco Range, Utah, 421
Stewart, C. A., discussion by, 278; on secondary silicate zones, 286
Stobie ore body, 507
Stokes, H. N., on action of ferric sulphate, 748; on pyrite and marcasite, 569
Stone, R. W., on Russell Fork coal field, 724
Stratigraphy, principles of, 407
Stremme, H., on composition of clay, 114
Structural geology, 405
Structure, San Francisco region, Utah, 420

Structure-contour method of determining depth, 64
Structure section, construction of, 143
Stuart, Murray, discussion by, 594; on the sedimentary deposition of oil, 595
*Studies in silver enrichment* (Palmer), 664
Studt, F. E., on geology of Belgian Congo, 612; on Katanga iron ores, 639
Sturgeon formation, 236
Stutzer, O., on Katanga copper ores, 627
*Sudbury nickel deposits, Petrographical notes on the* (Howe), 505
Sudbury ores, genesis, 365, 366
Suess, E., on ore deposition, 226; on thermal springs, 225
Sullivan, E. C., on interaction between minerals and water solutions, 571
Sulphide enrichment, 389, 390, 743; carbonates in, 483; downward, 583
Sulphide dispersion, range of temperatures, 588
Sulphur, amorphous, as a precipitant of the copper sulphides, 567; colloidal, behavior, 581; effect on dispersion of copper sulphide, 579
Sulphur springs, sediments of, 765
*Sulphur Springs, Ark., Spring deposits at* (Siebenthal), 758
Sulphuric acid, experiments with, 744
*Superficial diffusion in ore deposits, Certain phases of* (Penrose), 20
Superior mine, Plumas County, California, 369
Surface agencies, action on ore deposits, 20
Sylamore sandstone member, 758

Tables—classification of ore deposits, 235; comparison of the water of Sulphur Springs with deep well and mine waters, 762; for determining distances in structure sections, 144; Harney Peak minerals, 267; Katanga copper ore analyses, 628; relative activities of minerals in reducing acidity of ferric sulphate, 748; relative activity of minerals in decreasing acidity, 745; relative activity of minerals in reducing activity, 755
Talisman quartzite, 416
Tanganyika Concessions Co., Ltd., 617
Tasmanite, 735
Temiskamite, Elk Lake, Ontario, 669
Temperature of genesis, of Zimapan ore deposits, 456, 459
Tertiary eruptive rocks, 312
*Tetranickel-triarsenide, its capacity as silver precipitant* (Palmer), 664
Texas, underground waters of, 247
Theobald, on fossil wood, 596
Thermal metamorphism, 285
*Thickness contours, The use of, in the valuation of lenticular coal beds* (Rogers and Lesher), 707
Thickness contours, method of drawing, 709; scientific value, 727
Thickness of a formation, determination of, 51
Thiosulphate solutions, action on copper sulphate, 568
Thompson, A. P., *On the relation of pyrrhotite to chalcopyrite and other sulphides*, 153–174
Tin in Belgian Congo, 640
Tin, wolfram, and rare metals, recent literature on, 497, 693
*Tintic district, Utah, The oxidized zinc ores of* (Loughlin), 1
Titusville well, 245
Tolman, C. F., Jr., review by, 192
Tolman, C. F., and Clark, J. D., *The oxidation, solution, and precipitation of copper in electrolytic solutions and the dispersion and precipitation of copper sulphides from colloidal suspensions, with a geological discussion*, 559–592
Tomlinson, W. H., discussion by, 67
Topache limestone, 416, 534
Torbernite, 675
*Tourmaline-bearing gold quartz veins of the Michipicoten district, Ontario* (Means), 122
Tourmaline-bearing quartz veins, 689
Tourmalinization, 129
Trachyte porphyry, 312
Transport hypothesis of coal formation, 731
Treba, F. W. H. von, on ore deposition, 219
Truscott, S. J., review of book translated by, 776
Tshikapa diamond deposit, 652
Tullock Creek coal bed, Montana, 718
Tungsten in Belgian Congo, 648
Tungsten veins, 274
Turgite, 5
Turner, H. W., and Rogers, A. F., *A geologic and microscopic study*

*of a magmatic copper sulphide deposit in Plumas County, California, and its modification by ascending secondary enrichment*, 359–391
Tweefontein mine, 370
Tyuyamunite, 675

Ubanghi River, 608
Uglow, W. L., discussion by, 175; on secondary silicate zones, 286
Umpleby, J. B., *The genesis of the Mackay copper deposits, Idaho*, 307–358; discussion by, 593; review by, 703
Uncle Sam mine, Utah, 1
Underground water, 243
Union mine, North Carolina, 165
Union Minière du Haut Katanga, 617; tin holdings, 641
Upper Banner coal bed in Russell Fork coal field, Dickinson County, Virginia, 724
Uranospinite, 675
*Use of thickness contours in the valuation of lenticular coal beds* (Rogers and Lesher), 707
Useful minerals and rocks, deposits of, 776
Utah carnotite field, 676

Vadose waters, 229
Valley mine, Utah, 1
*Valuation of lenticular coal beds, The use of thickness contours in the* (Rogers and Lesher), 707
Value of thickness contours, 724
Vanadium, 681
Van Hise, C. R., on Joplin lead and zinc deposits, 759; on ore deposition, 223, 228, 230; on secondary sulphide enrichment, 743
Van Hise, C. R., and Leith, C. K., on accumulation of chlorine in underground waters, 248; on iron-ore deposits of Lake Superior, 211
Van Ryn conglomerate, 207
Vegetable matter, accumulation of, 731
Veins, colloidal characteristics, 589; Michipicoten district, Ontario, 123, 128
Vershire copper deposits, Vt., 158
Vesuvianite, 76
Victoria copper mine, Michigan, plan, 251
Victoria ore deposit, 507
Virginia, underground waters of, 244
Vogt, J. H. L., on ore deposition, 224; review of work by, 776
Volcanoes, Kivu region, 613
Volume changes absent during metamorphism, 344

Walker, T. L., on Sudbury nickel district, 506; on temiskamite, 667
Ward, L. K., on the Heemskirk massif, 398, 401
Waring, W. G., analyses by, 762, 764
Warren, C. H., on danburite, 447
Washburne, C. W., on chlorine in underground waters, 248
Washington Camp, Arizona, 287
Water, analyses, 262, 762; recent literature on, 96, 501, 696
Water level, San Francisco district, Utah, 541
Wawa City, Ontario, 122
Wa Wa Range, Utah, 415
Weathering, effect on iron ores, 105
Webb, H. H., on gold fields of South Africa, 231
Weed, W. H., on Butte district, Mont., 211; on copper deposits of Appalachian States, 153; on ores of Butte district, 464; on secondary sulphide enrichment, 743; on silica precipitated by algæ, 597; on sulphide enrichment, 389
Well waters, analyses of, 762
Wells, R. C., analyses by, 425, 429
Wemashi beds, 620
Wendt, A. F., on pyrite deposits of the Alleghanies, 153
Werner, A. G., on ore deposition, 220
Wheeler, H. S., on Vermont copper deposits, 154
Wheeler, W. C., analyses by, 329; porosity determinations by, 346
Wherry, E. T., on occurrence of carnotite, 676
Whitehead, W. L., with Lindgren, W., *A deposit of jamesonite near Zimapan, Mexico*, 435–462
White Knob, Mackay, Idaho, 309, 322
White Sulphur Spring, sediments of, 766
Whitney, J. D., on sulphide deposits in the Eastern states, 153
Wickliffe well, 246
Wild Bill mine, Utah, 535
Winchell, A. N., on colloidal characteristics of ores, 590
Winchell, H. V., on chalcocite, 566; review by, 598
Wisconsin, underground waters of, 247

Witwatersrand Banket, 231
Witwatersrand formation, 208
Wixford, J. F., analysis of water by, 762
Wolftonite, 6
Wollastonite rock, 340; analysis, 329
Woodward, A. E., analysis of water by, 762
Wurtzite, 555

Xhignesse and Mercenier, on geology of Lukuga coal basin, 621

Yankee mine, Utah, 1
Yankee mine, ore bodies, 9
Young, R. E., on replacement deposits, 234

Zeunerite, 675
Ziegler, Victor, *The differentiation of a granitic magma as shown by the paragenesis of the minerals of the Harney Peak region, S. D.*, 264–277
*Zimapan, Mexico, A deposit of jamesonite near* (Lindgren and Whitehead), 435
Zimmerman, C. F., on ore deposition, 219
Zinc carbonates in Yankee mine, 9
Zinc ores, Joplin district, origin, 759
*Zinc ores, oxidized, of the Tintic district, Utah* (Loughlin), 1
Zinc output of Utah, 1
Zinc stope, May Day mine, Utah, 10
Zinc sulphides, Horn Silver mine, 553, 554
Zobinsky, on Tertiary and Cretaceous rocks, Belgian Congo, 609
Zsigmondy, R. A., on colloids, 561
Züber, R., on bacterial action on vegetable matter, 595
